Concept Challenge: Procedure

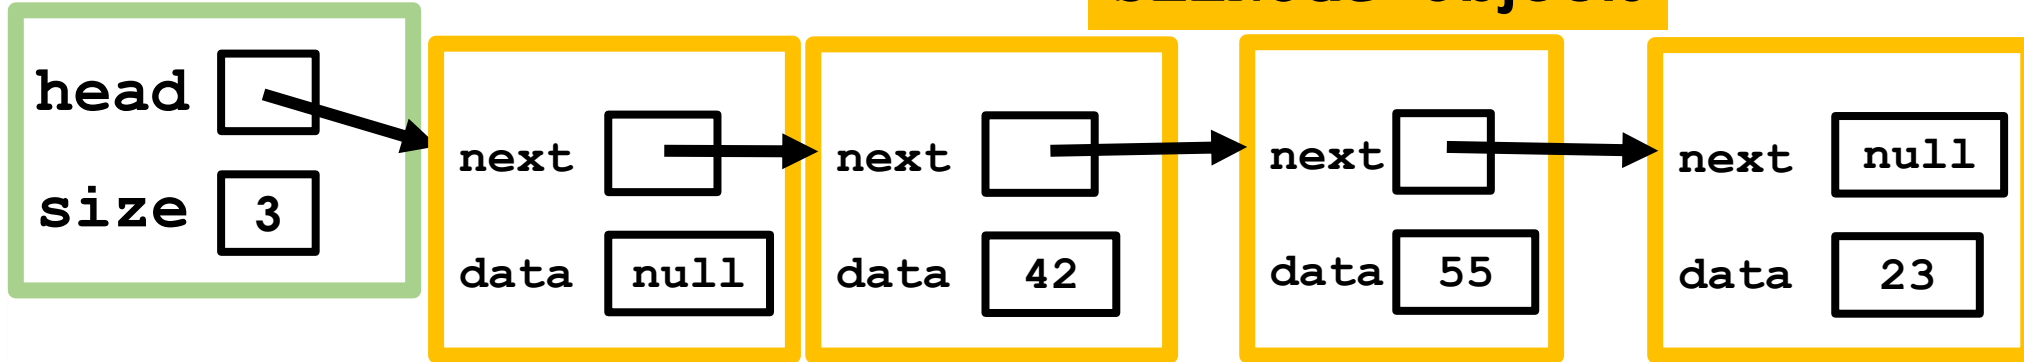

- **Pause** Try to solve the problem yourself
- **Discuss** with other learners (if you can)
- **Watch** the UC San Diego learners video
- **Answer** the question again
- **Confirm** your understanding with our explanation

Implementing a Singly Linked List in Java

SLinkedList
object

SLLNode objects

Implementing a Singly Linked List in Java

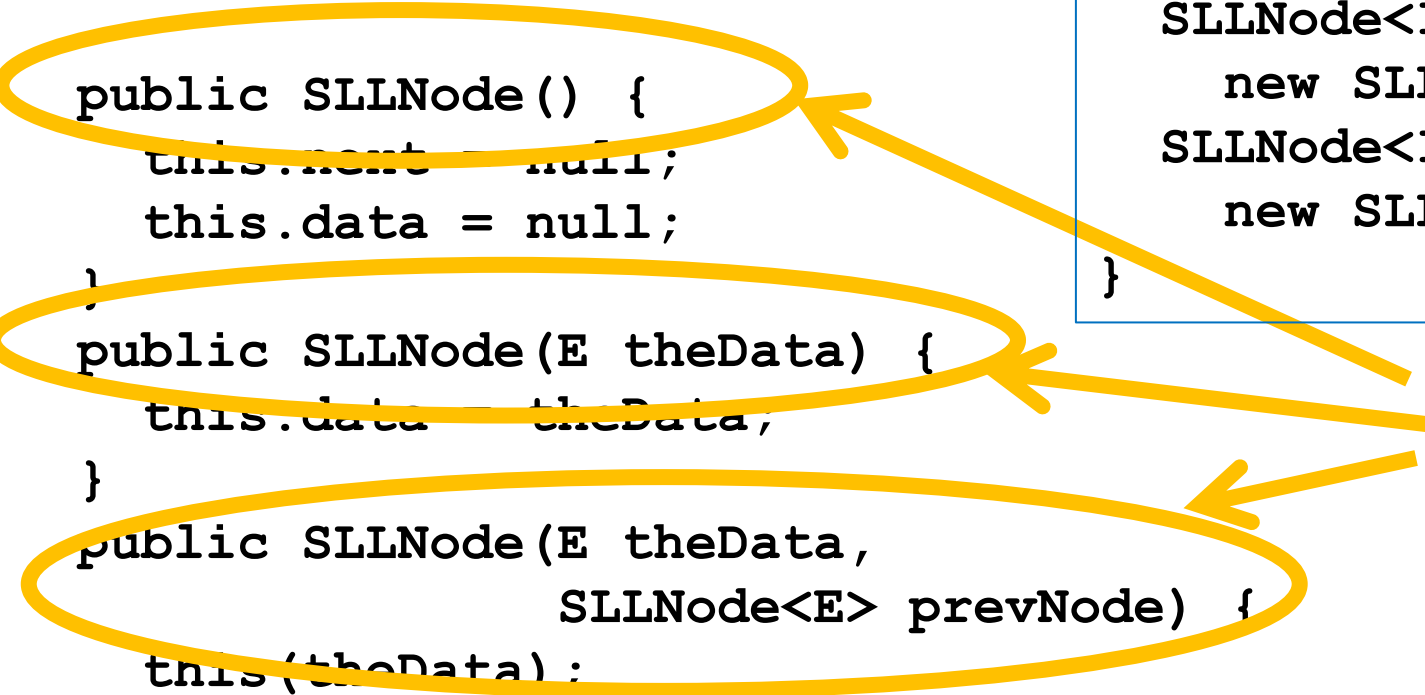

```
class SLLNode<E>
{
    SLLNode<E> next;
    E data;

    public SLLNode(E theData) {
        this.data = theData;
    }
    public SLLNode(E theData,
                  SLLNode<E> prevNode) {
        this(theData);
        this.next = prevNode.next;
        prevNode.next = this;
    }
}
```

```
public static void main(String[] args)
{
    SLLNode<Integer> n0 =
        new SLLNode<Integer>();
    SLLNode<Integer> n1=
        new SLLNode(1,n0);
    SLLNode<Integer> n2 =
        new SLLNode(2,n0);
}
```

```
class SLLNode<E> {  
    SLLNode<E> next;  
    E data;  
  
    public SLLNode() {  
        this.next = null;  
        this.data = null;  
    }  
  
    public SLLNode(E theData) {  
        this.data = theData;  
    }  
  
    public SLLNode(E theData,  
                  SLLNode<E> prevNode) {  
        this(theData);  
        this.next = prevNode.next;  
        prevNode.next = this;  
    }  
}
```

```
public static void main(String[] args)  
{  
    SLLNode<Integer> n0 =  
        new SLLNode<Integer>();  
    SLLNode<Integer> n1 =  
        new SLLNode(1, n0);  
    SLLNode<Integer> n2 =  
        new SLLNode(2, n0);  
}
```

```

class SLLNode<E> {
    SLLNode<E> next;
    E data;

    public SLLNode() {
        this.next = null;
        this.data = null;
    }
    public SLLNode(E theData) {
        this.data = theData;
    }
    public SLLNode(E theData,
                   SLLNode<E> prevNode) {
        this(theData);
        this.next = prevNode.next;
        prevNode.next = this;
    }
}

```

```

public static void main(String[] args)
{
    SLLNode<Integer> n0 =
        new SLLNode<Integer>();
    SLLNode<Integer> n1=
        new SLLNode(1,n0);
    SLLNode<Integer> n2 =
        new SLLNode(2,n0);
}

```

What does the list of nodes look like at the end of main?

E Null pointer exception

Learner video here

```
class SLLNode<E> {
    SLLNode<E> next;
    E data;

    public SLLNode() {
        this.next = null;
        this.data = null;
    }

    public SLLNode(E theData,
        SLLNode<E> prevNode) {
        this(theData);
        this.next = prevNode.next;
        prevNode.next = this;
    }
}
```

```
public static void main(String[] args)
{
    SLLNode<Integer> n0 =
        new SLLNode<Integer>();
    SLLNode<Integer> n1=
        new SLLNode<Integer>(1,n0);
    SLLNode<Integer> n2 =
        new SLLNode<Integer>(2,n0);
}
```

**Let's draw the diagram
one line at a time**

```
SLLNode<Integer> n0 = new SLLNode<Integer>();
```

n0 

```
SLLNode<Integer> n0 = new SLLNode<Integer>();
```

No-arg constructor

```
public SLLNode() {  
    this.next = null;  
    this.data = null;  
}
```

n0

```
SLLNode<Integer> n0 = new SLLNode<Integer>();
```

No-arg constructor

```
public SLLNode() {  
    this.next = null;  
    this.data = null;  
}
```

```
SLLNode<Integer> n1 = new SLLNode(1, n0);
```

`n1` 

```
public SLLNode(E theData,  
               SLLNode<E> prevNode) {  
    this(theData);  
    this.next = prevNode.next;  
    prevNode.next = this;  
}
```

```
SLLNode<Integer> n1 = new SLLNode(1, n0);
```

```
public SLLNode(E theData,  
               SLLNode<E> prevNode) {  
    this(theData);  
    this.next = prevNode.next;  
    prevNode.next = this;  
}
```

```
SLLNode<Integer> n1 = new SLLNode(1, n0);
```

```
public SLLNode(E theData,  
               SLLNode<E> prevNode) {  
    this(theData);  
    this.next = prevNode.next;  
    prevNode.next = this;  
}
```

```
SLLNode<Integer> n1 = new SLLNode(1, n0);
```

```
public SLLNode(E theData,  
               SLLNode<E> prevNode) {  
    this(theData);  
    this.next = prevNode.next;  
    prevNode.next = this;  
}
```

```
SLLNode<Integer> n1 = new SLLNode(1, n0);
```

```
